01. Market Commentary

DSEX ended in red for the week decreasing by 143.63 points [2.54%] compared to the previous week. It stands at 5517.42 points.

Index continued its bull run in the opening trading day of the week rising by around 35 points in the day. However, the market went negative for the rest of the week. The sellers capitalized on the modest gains in the previous two weeks. Furthermore, the selling pressure became more exacerbated due to the growing concerns regarding proposal of imposition of capital gains tax above BDT 40 Lakhs. This resulted in the index falling sharply this week.

Investor participation decreased this week as reflected by decrease in average daily turnover by around 35% and the average daily turnover went down to BDT 600 Crore level. Investors' trades in this week mostly focused on Pharmaceuticals, Textile and Food & Allied scrips. The Fuel & Power sector posted the highest positive return while the Jute sector registered the highest correction.

Market capitalization stands at USD 59.7 Billion*.

*(USD 1 = BDT 117.5275 as on May 16, 2024).
