01. Market Commentary

DSEX ended in green for the week increasing by 8.75 points [0.15%] compared to the previous week. It stands at 5735.27 points.

Index started the week with downward momentum due to recent earnings declaration but rebounded later in the week as the bulls gained the upper hand as they looked to enter into long positions in specific bargain scrips. The recent announcements regarding foreign aid commitments may have worked as a catalyst in such positive movement. This caused the index to close slightly higher than the previous weeks' position.

Investor participation decreased this week as reflected by decrease in average daily turnover by around 8% and the average daily turnover dropped below the BDT 600 Crore level. Investors' trades in this week mostly focused on Pharmaceuticals, Bank and Fuel & Power scrips. The Jute sector reflected the highest positive movement of 8.62% while the Ceramics sector reflected the highest negative movement of 2.49%.
