01. Market Commentary

DSEX ended in red for the week decreasing by 91.39 points [1.76%] compared to the previous week. It stands at 5105.43 points.

The index fell in all of the trading days this week amidst lackluster performance in the previous two weeks due to pessimistic investor sentiment regarding the market. On top of existing economic and political uncertainties, regulatory initiatives against stock manipulators fueled the selling pressure in the market to such extent that the news of loan disbursement to ICB failed to generate any sort of positive momentum in the market.

Investor participation decreased this week as reflected by decrease in average daily turnover by around 27.5% and the average daily turnover decreased to below BDT 400 Crore level. Investors' trades in this week focused on Pharmaceuticals scrips followed by Textile and Bank scrips. In terms of sectoral returns, except the Textile sector, all sector underwent corrections with the Paper & Printing suffering the most with losses of 6.17%.

Market capitalization stands at USD 54.4 Billion*.

*(USD 1 = BDT 120.00 as on December 12, 2024).
