01. Market Commentary

DSEX ended in red for the week decreasing by 5.19 points [0.10%] compared to the previous week. It stands at 5194.43 points.

The index, just like in the previous week remained flat this week and exhibited a sideways trend in the beginning of first two weeks of 2025. Investors remained cautious in the week as the meeting of the finance adviser with the stakeholders failed to bring any sort of optimism amidst the pessimistic outlook of the investors. Coupled with the possibility of a hike in VAT rates on certain goods and services which further fueled the investors' concern regarding increases in inflationary pressure.

Investor participation decreased this week as reflected by decrease in average daily turnover by around 0.44% causing the average daily turnover to remain in the BDT 300 Crore level. Investors' trades in this week focused predominantly on Bank scrips followed by Pharmaceuticals and Engineering scrips. In terms of sectoral returns, the IT sector posted the highest gains of 4.33% while the Ceramics sector shed the most with 2.77%.

Market capitalization stands at USD 55.0 Billion*.

*(USD 1 = BDT 120.00 as on January 09, 2025).
