01. Market Commentary

DSEX ended in green for the week increasing by 15.17 points [0.29%] compared to the previous week. It stands at 5199.62 points.

The index remained quite flat this week and showed a possible sideways trend in the first week of 2025. The final two trading days of 2024 saw a moderate two digit increase as investors preferred to take positions in December ending companies, specifically bank scrips. Some investors tended to remain on the sidelines due to the existent pessimistic market sentiment which explained the existent low average daily turnover.

Investor participation increased this week as reflected by increase in average daily turnover by around 18% causing the average daily turnover to rise above BDT 300 Crore level. Investors' trades in this week focused predominantly on Bank scrips followed by Pharmaceuticals and Food & Allied scrips. In terms of sectoral returns, the Bank sector posted the highest gains of 3.42% while the Jute sector shed the most with 4.89%.

Market capitalization stands at USD 55.2 Billion*.

*(USD 1 = BDT 120.00 as on January 02, 2025).
